Concluding thoughts on cartography, compilation, sharing

The background of the slide features a photograph of a scuba diver in the foreground, swimming towards the camera. The water is a vibrant turquoise color. In the distance, several large, white icebergs are visible against a dark, cloudy sky.

|SAM: DATA SOURCES & LICENSING

LICENSE TYPES USED

1. Data developed by National Geographic

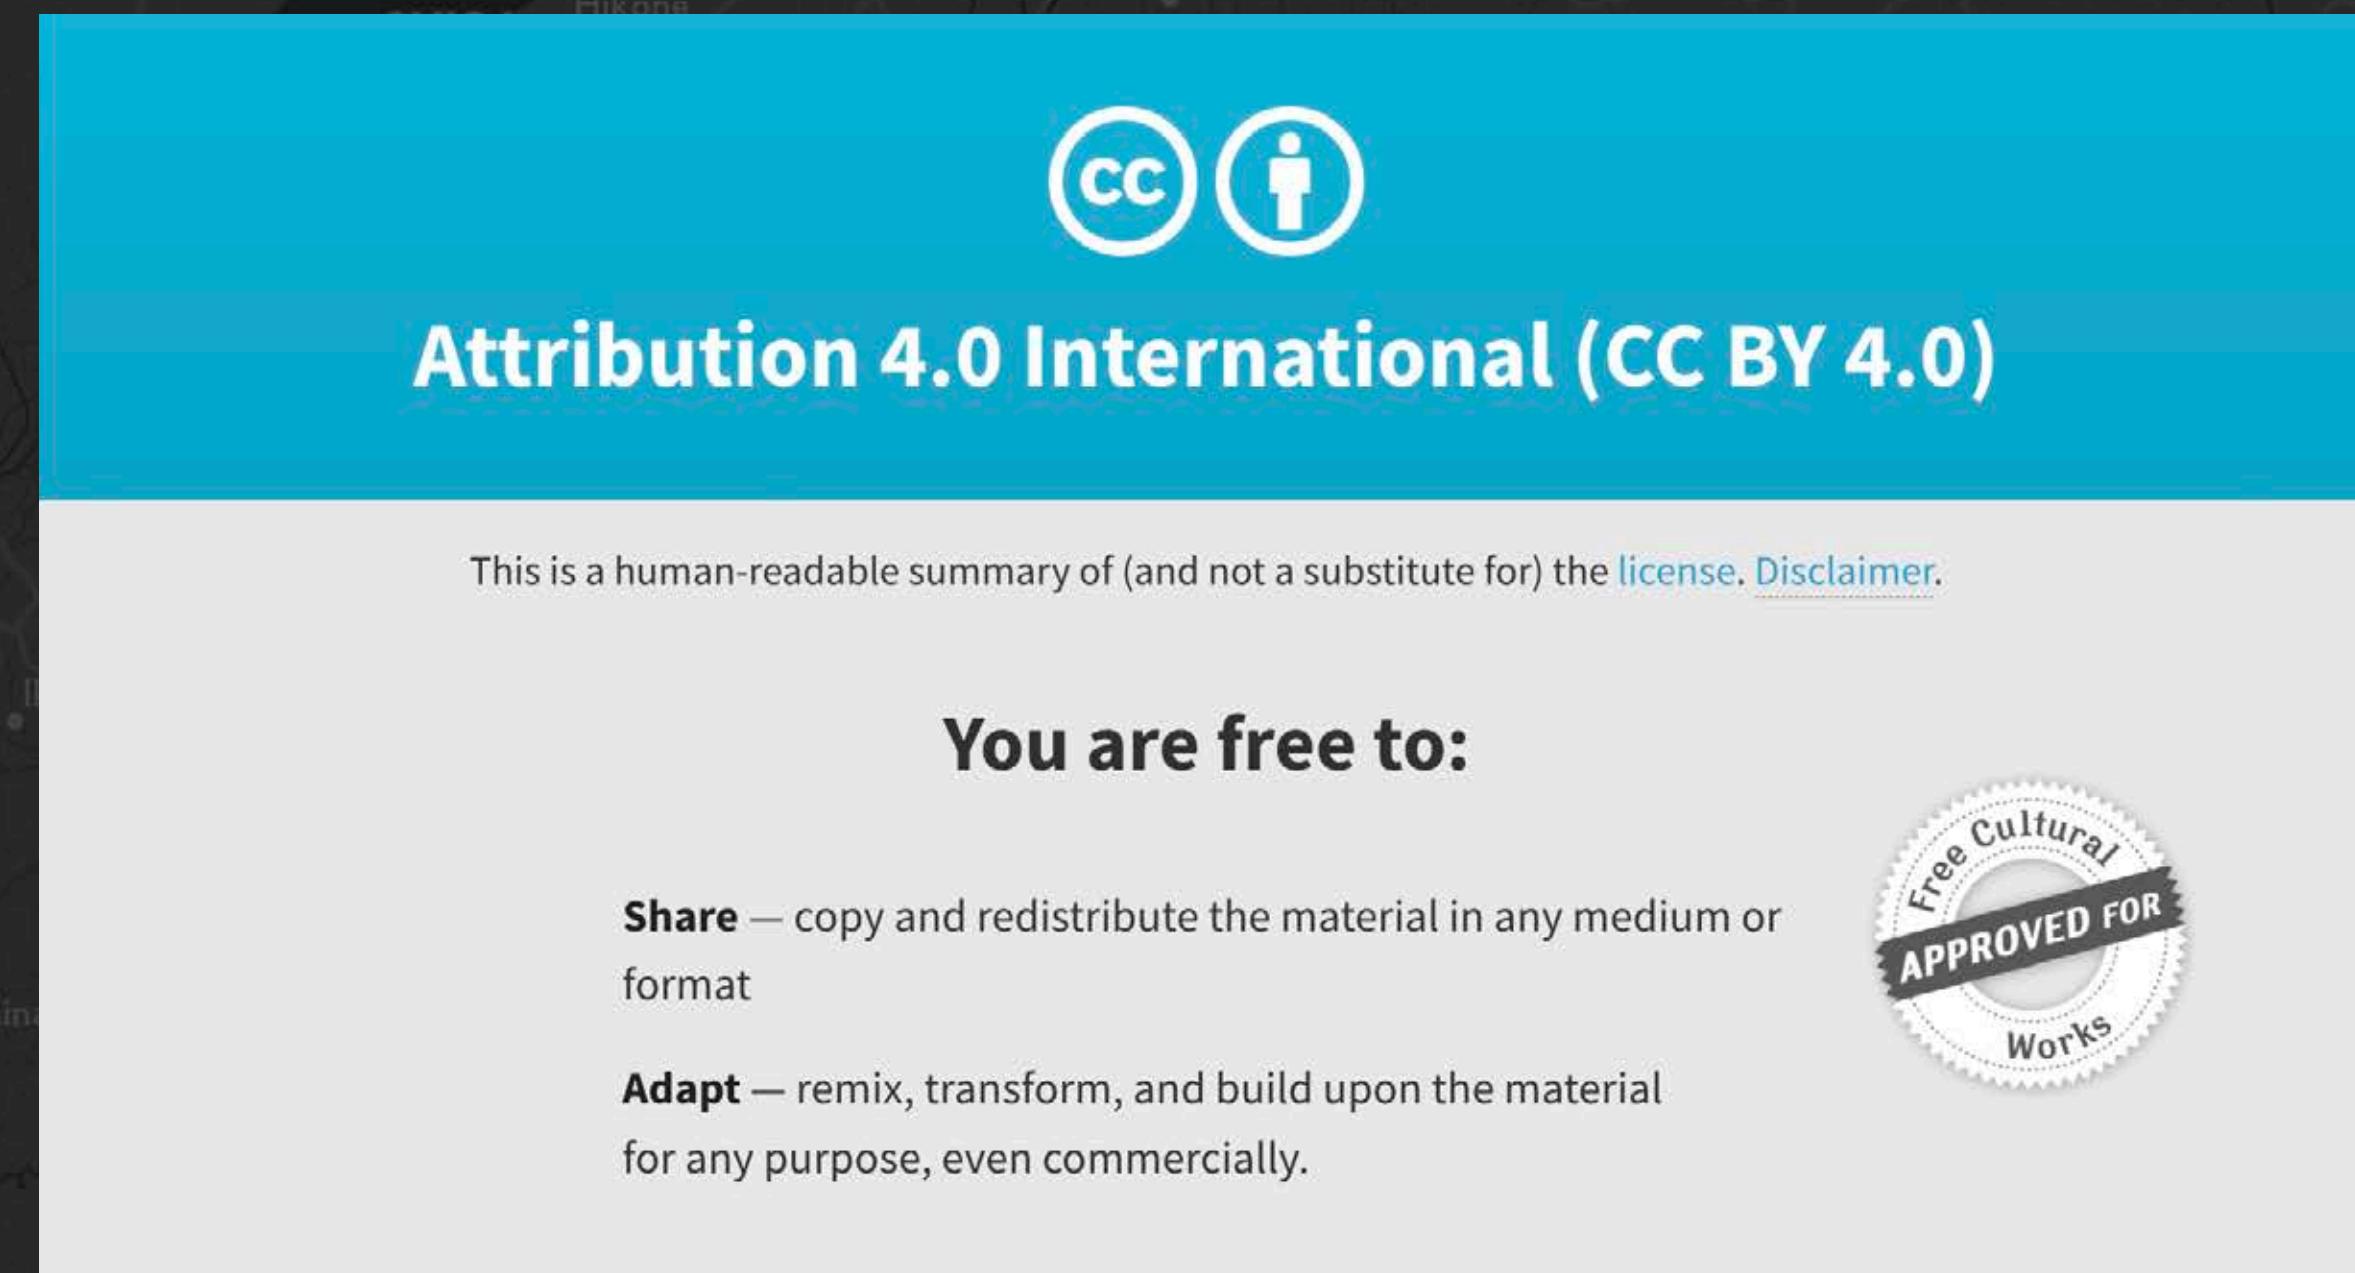

2. Data licensed from other providers

3. Open data!

OPEN DATA REQUIREMENTS

- High quality and high resolution
- Free, no contracts
- Available for nonprofit and commercial use

MOST COMMON LICENSES AND/OR USAGE SPECS

- CC BY (Attribution)
- Freely available with no restrictions on use
- Freely available with no restrictions on use, *given attribution*
- Written permission
- No license information provided
- Other specific named licenses functionally similar to CC BY

See our sources: <https://www.nationalgeographic.com/pages/article/about-our-basemaps/>

EXAMPLES

CC BY 4.0 (Ecuador)

ETAlab Open License 2.0 (France)

- The Grantor grants to the Reuser a non-exclusive and free right of free Reuse of the Information object of this license, whether for commercial purposes or not, for the entire world and for unlimited duration, under certain conditions.
- Mention the authorship of the Information

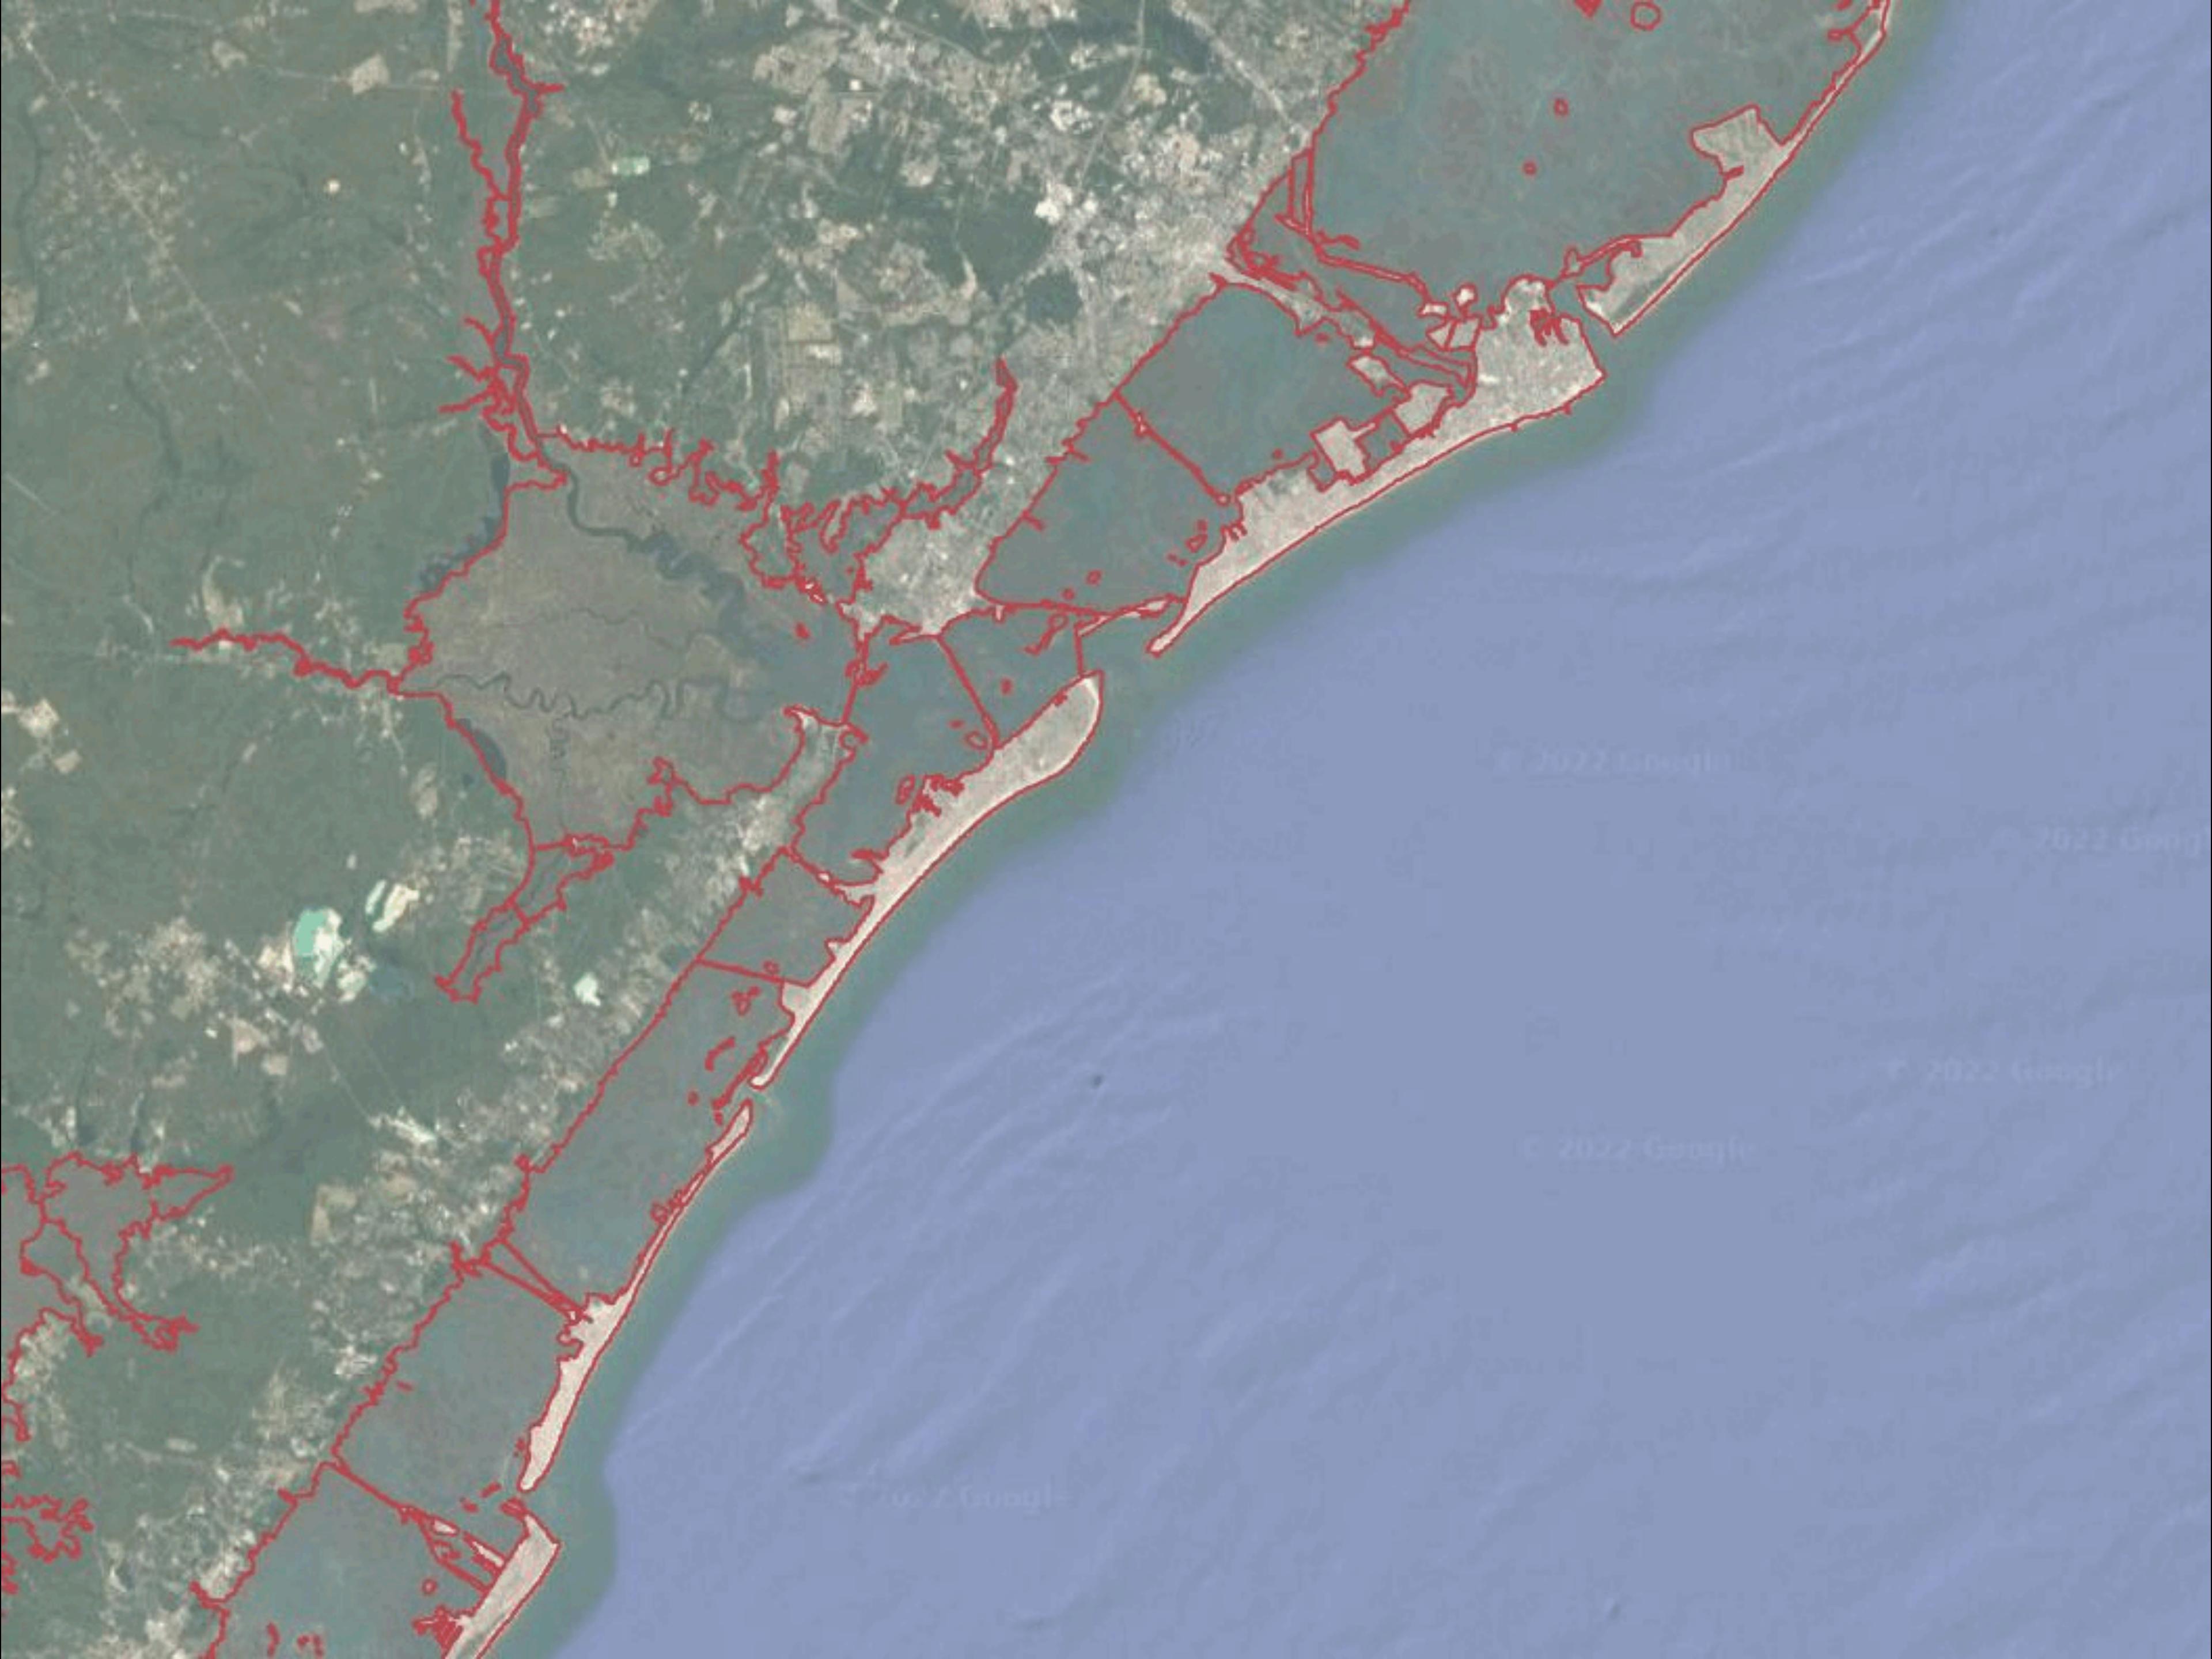

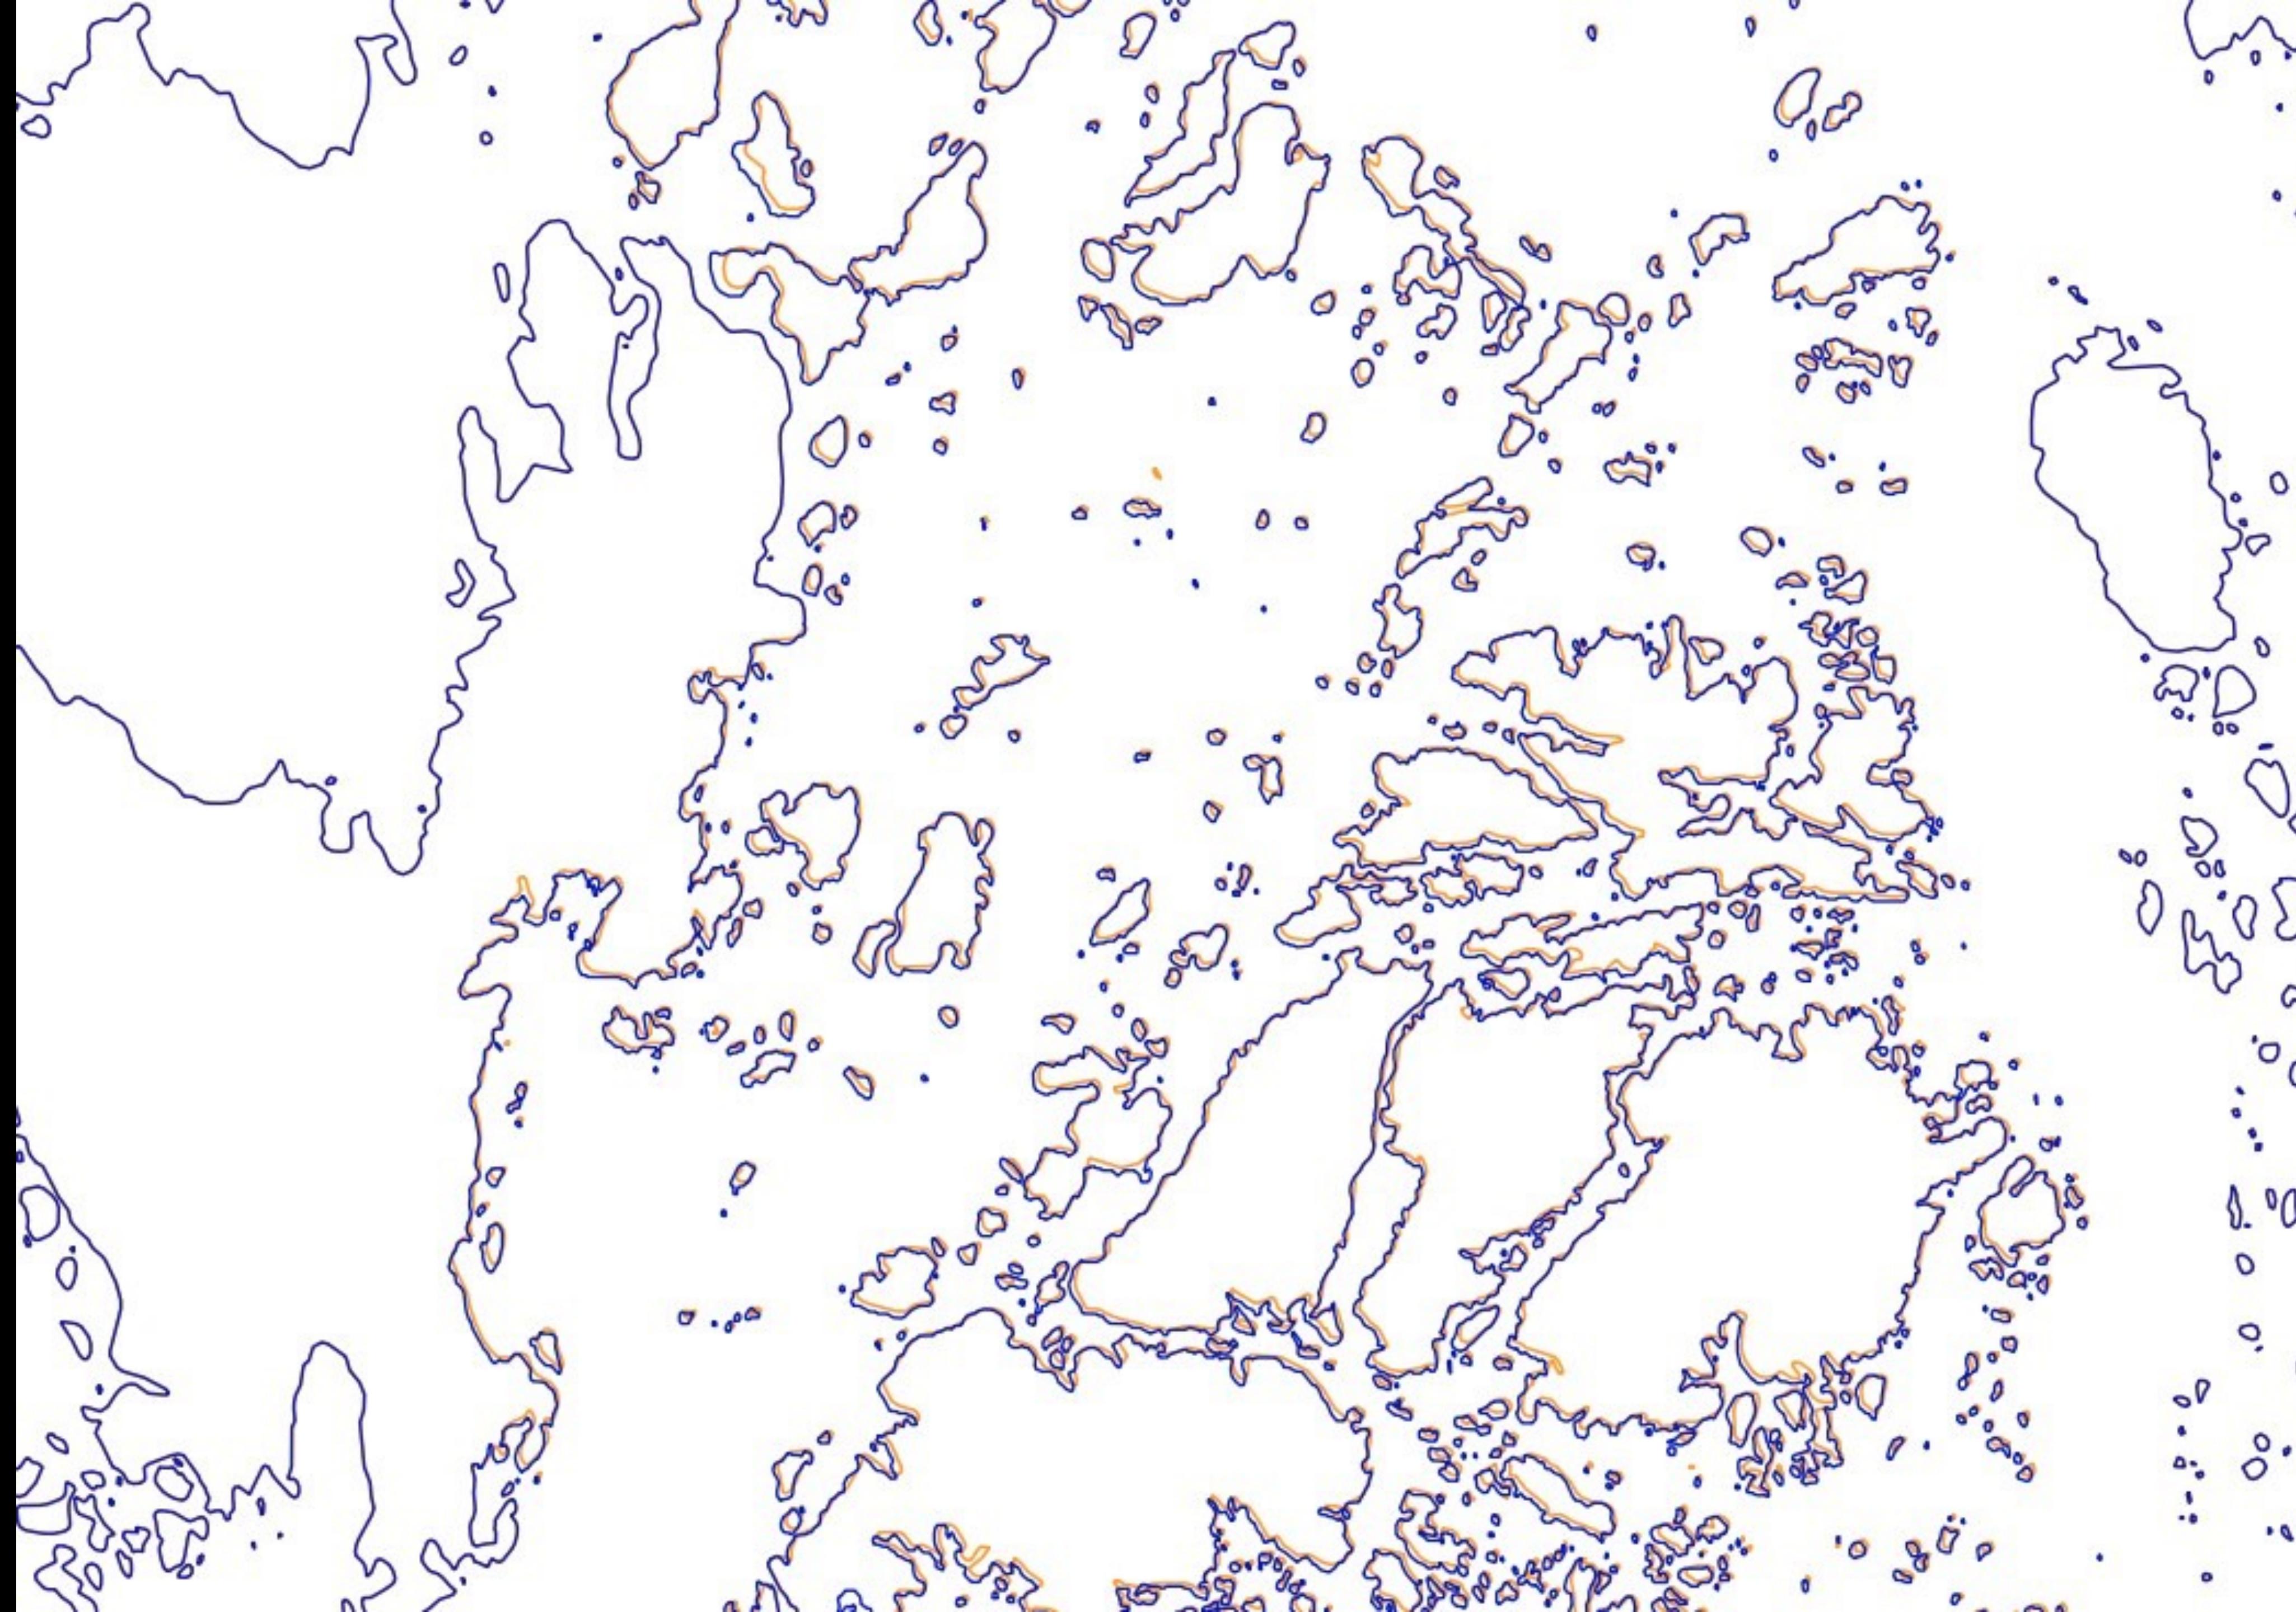

A wide-angle photograph of a coastal landscape at sunset. In the foreground, dark blue ocean waves are visible. Several seagulls are silhouetted against the bright sky, some flying low over the water. The middle ground features a range of mountains with snow-capped peaks. The sky is filled with warm, orange and yellow hues from the setting sun, which is partially visible on the right side.

|NAT: COASTLINES

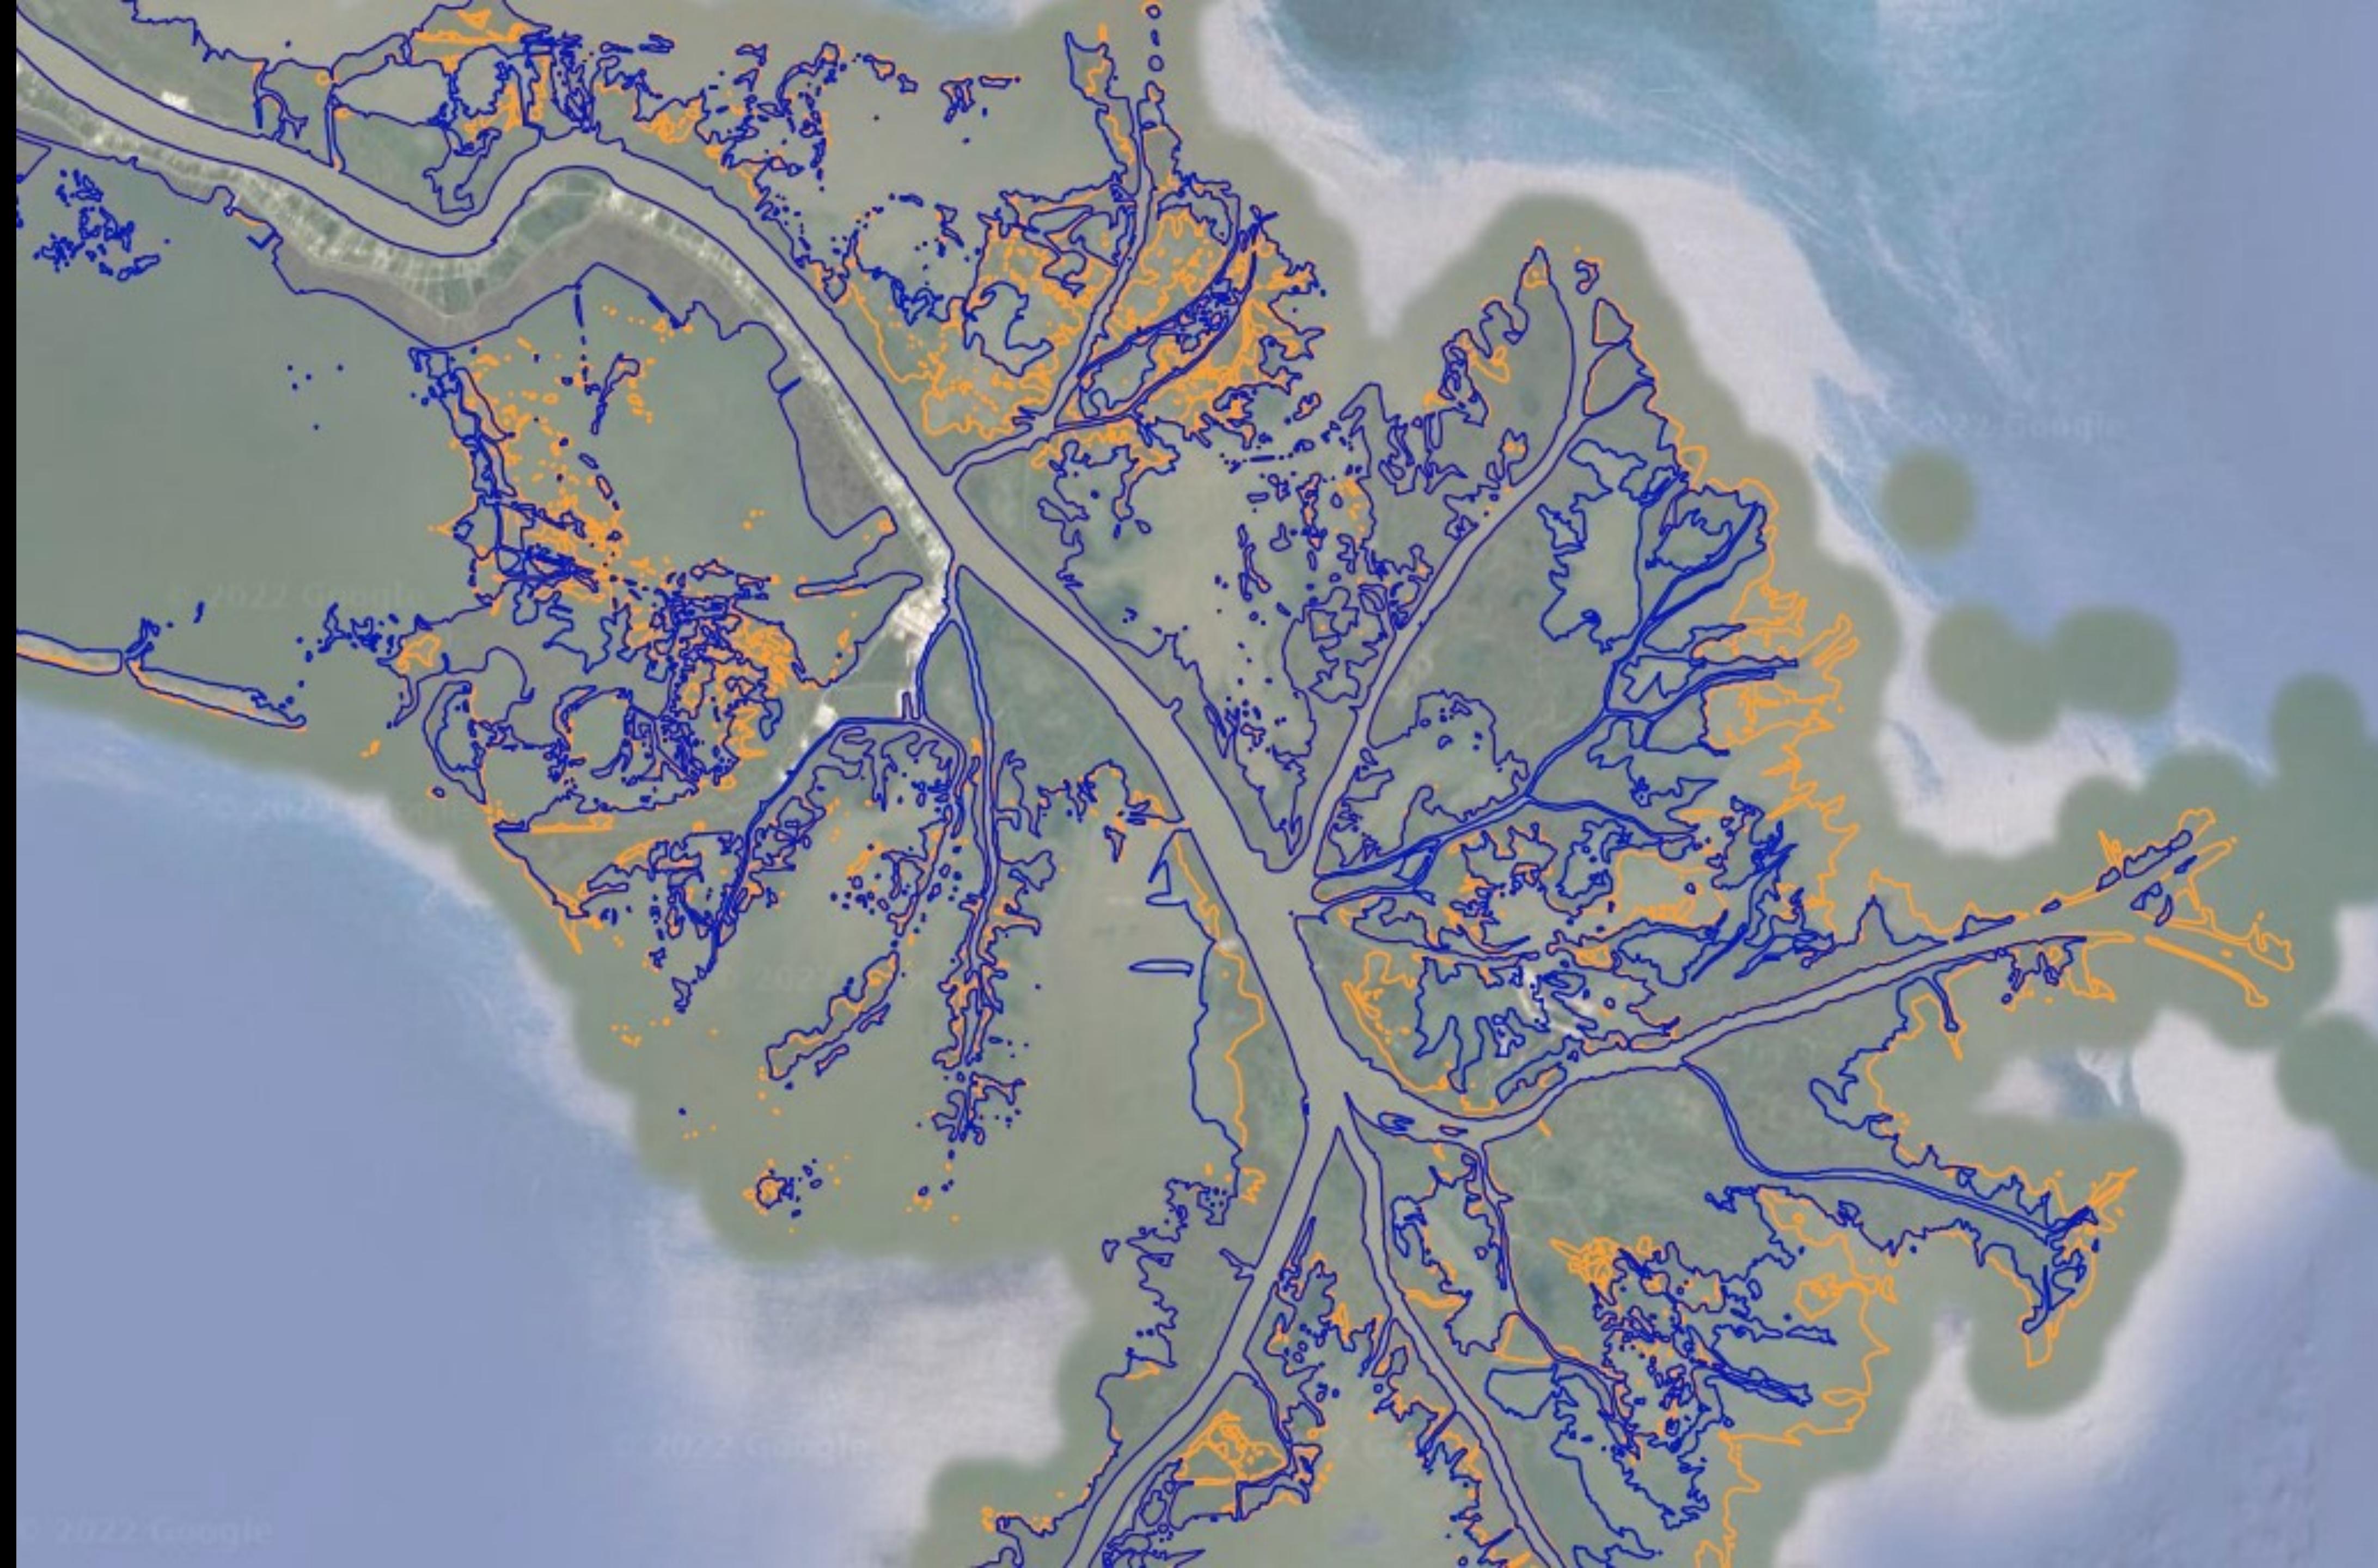

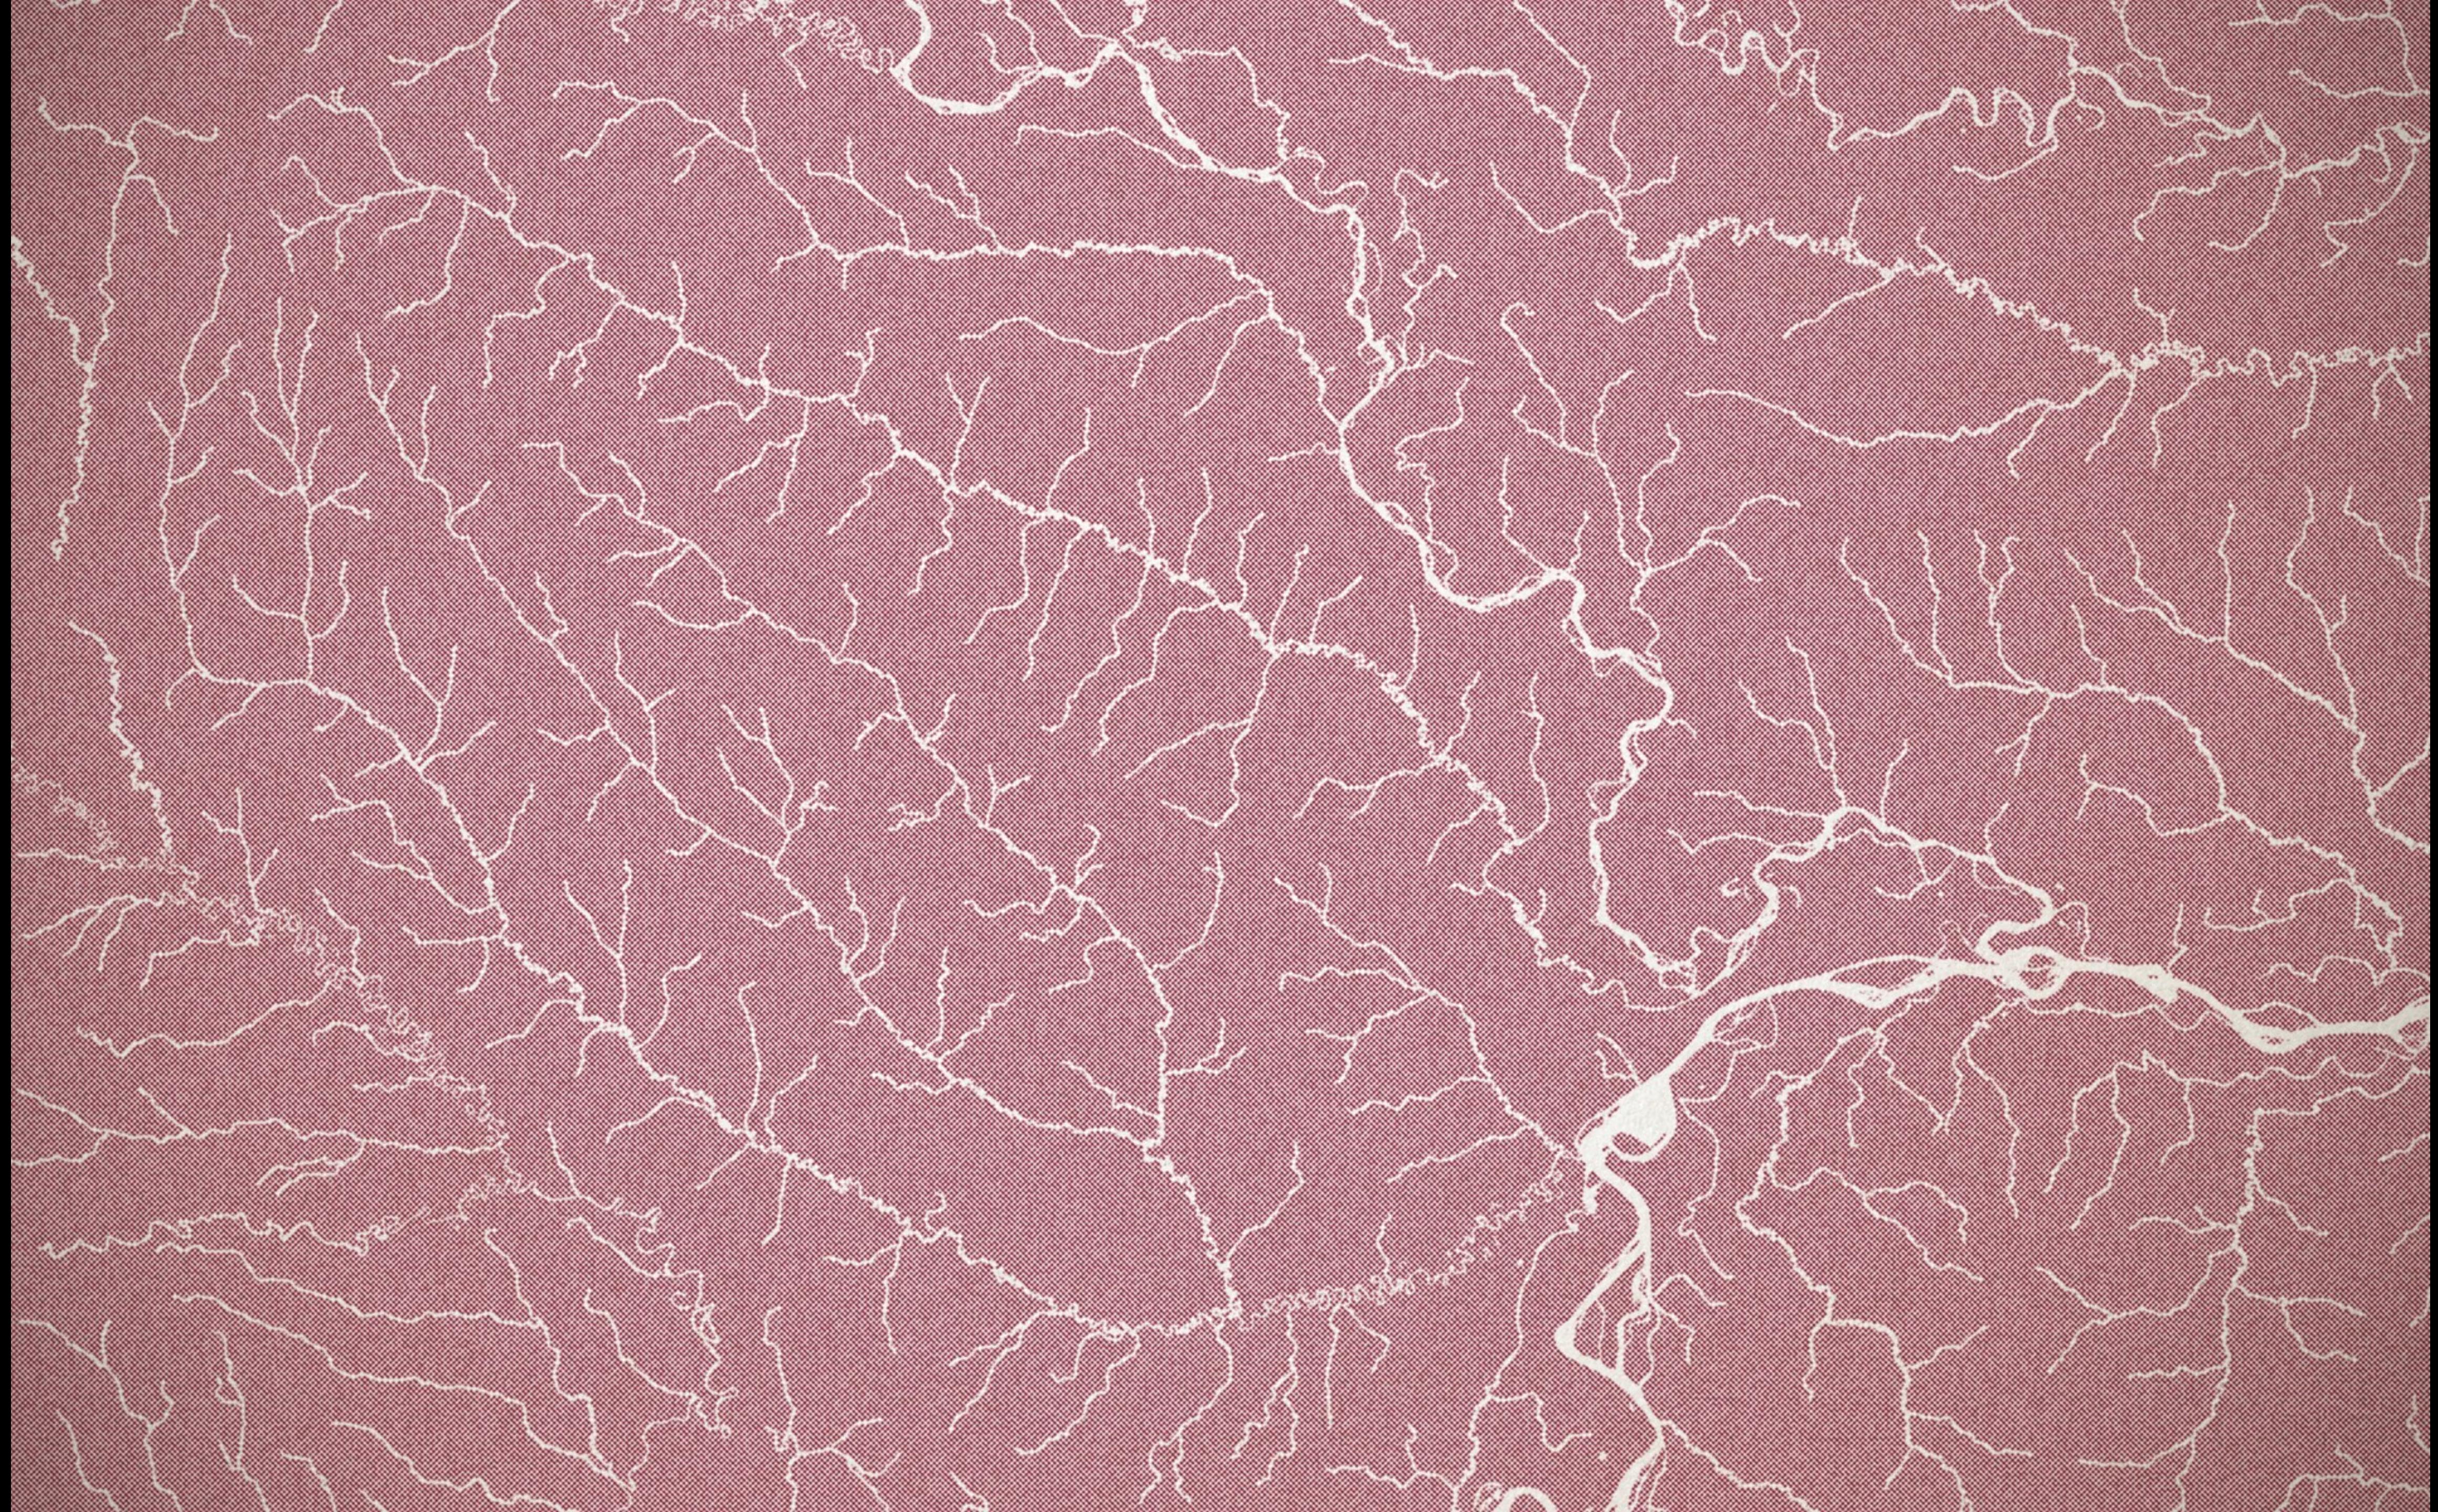

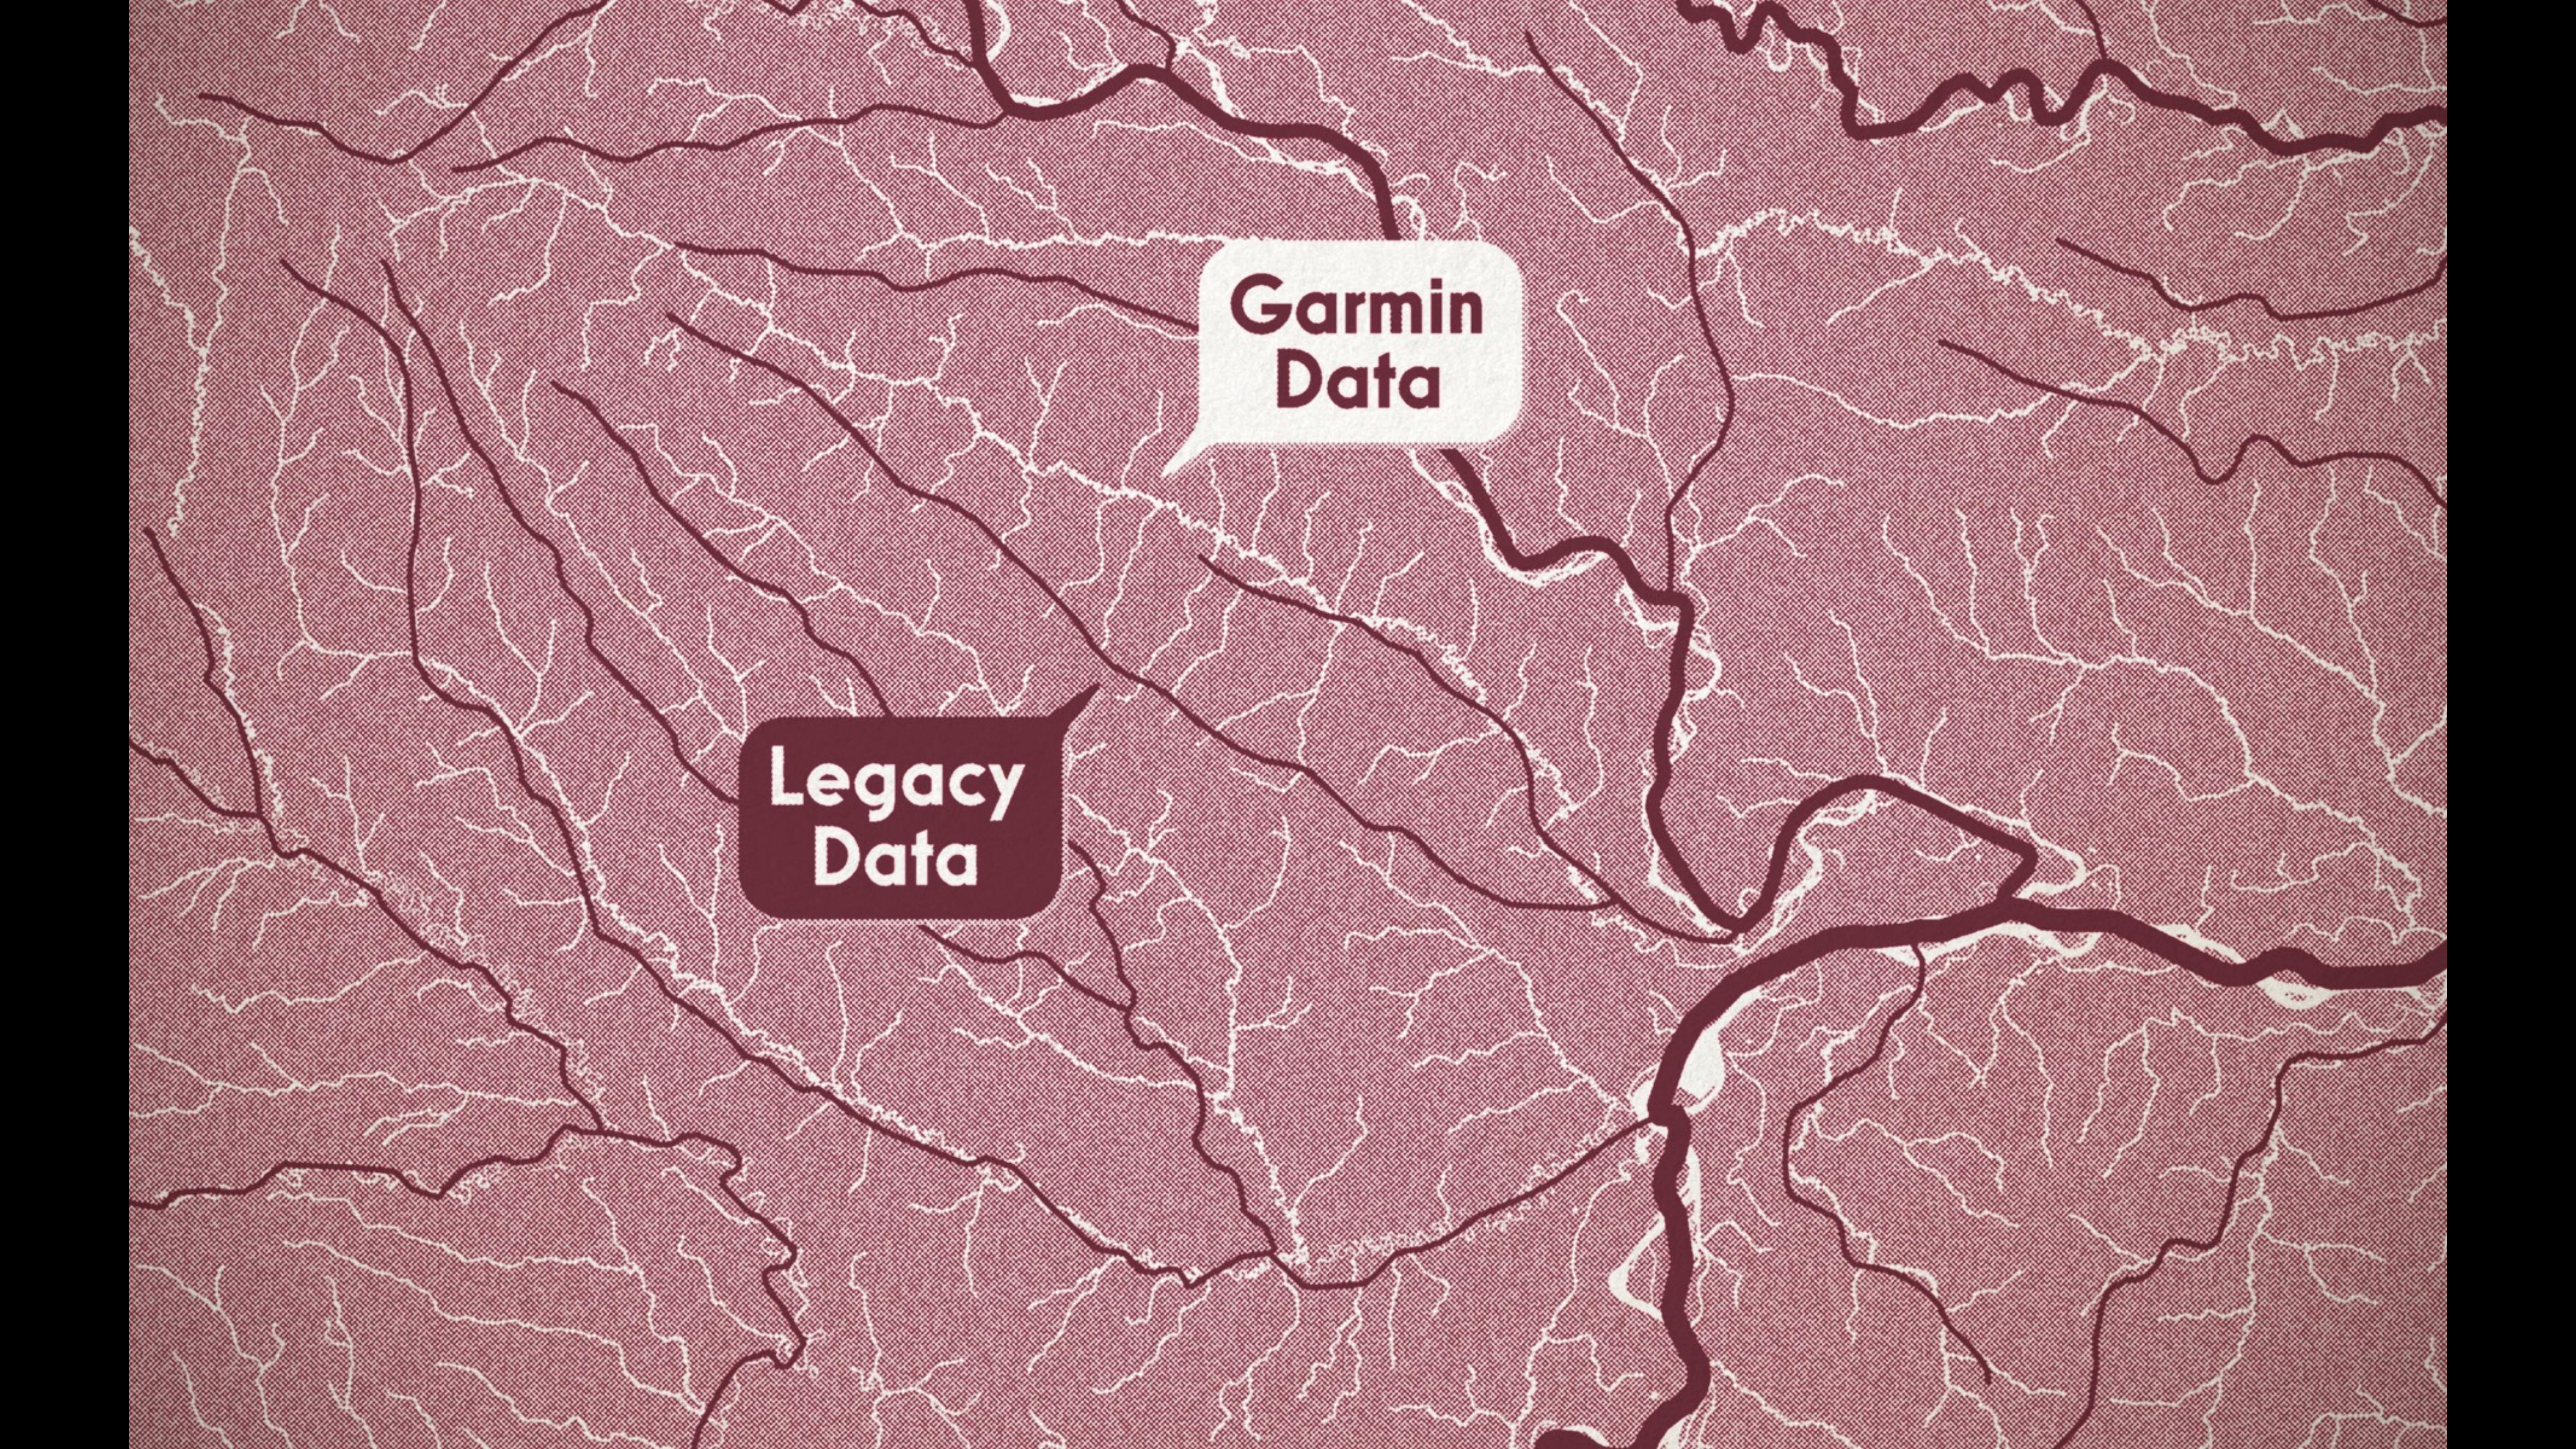

A wide-angle photograph of a dense tropical forest shrouded in thick fog or mist. In the lower-left foreground, a man stands on a narrow, weathered wooden bridge that spans a rocky, misty riverbed. He is wearing a blue t-shirt and dark shorts, and holds a long wooden pole or staff. The surrounding environment is lush with various tropical plants and trees, their details obscured by the heavy mist.

The background of the slide is a close-up photograph of a massive school of fish, likely sardines or anchovies, swimming in a circular, swirling pattern. The fish are small and silvery, creating a dense, textured mass against a darker blue background.

| ALEX: SYSTEMS, SCALES, SHARING

System of Record and Production

Incorporating the needs of a database for NG Map Policy (system of record) and a database for cartography (system of production)

- Critical features (political boundaries, GPUs, etc.) for Map Policy
- Attributes to enable effective mapmaking
- Uses identified in 1999 for the original NGS CDB and current uses for multi-scale digital mapping
- An integrated mapping and geospatial data platform

| Scales and complementarity

- NGS CDB 2.0

Compilation scale at 1:200,000 (z 11.5)

2nd maintained scale at 1:2,000,000 (z 8)

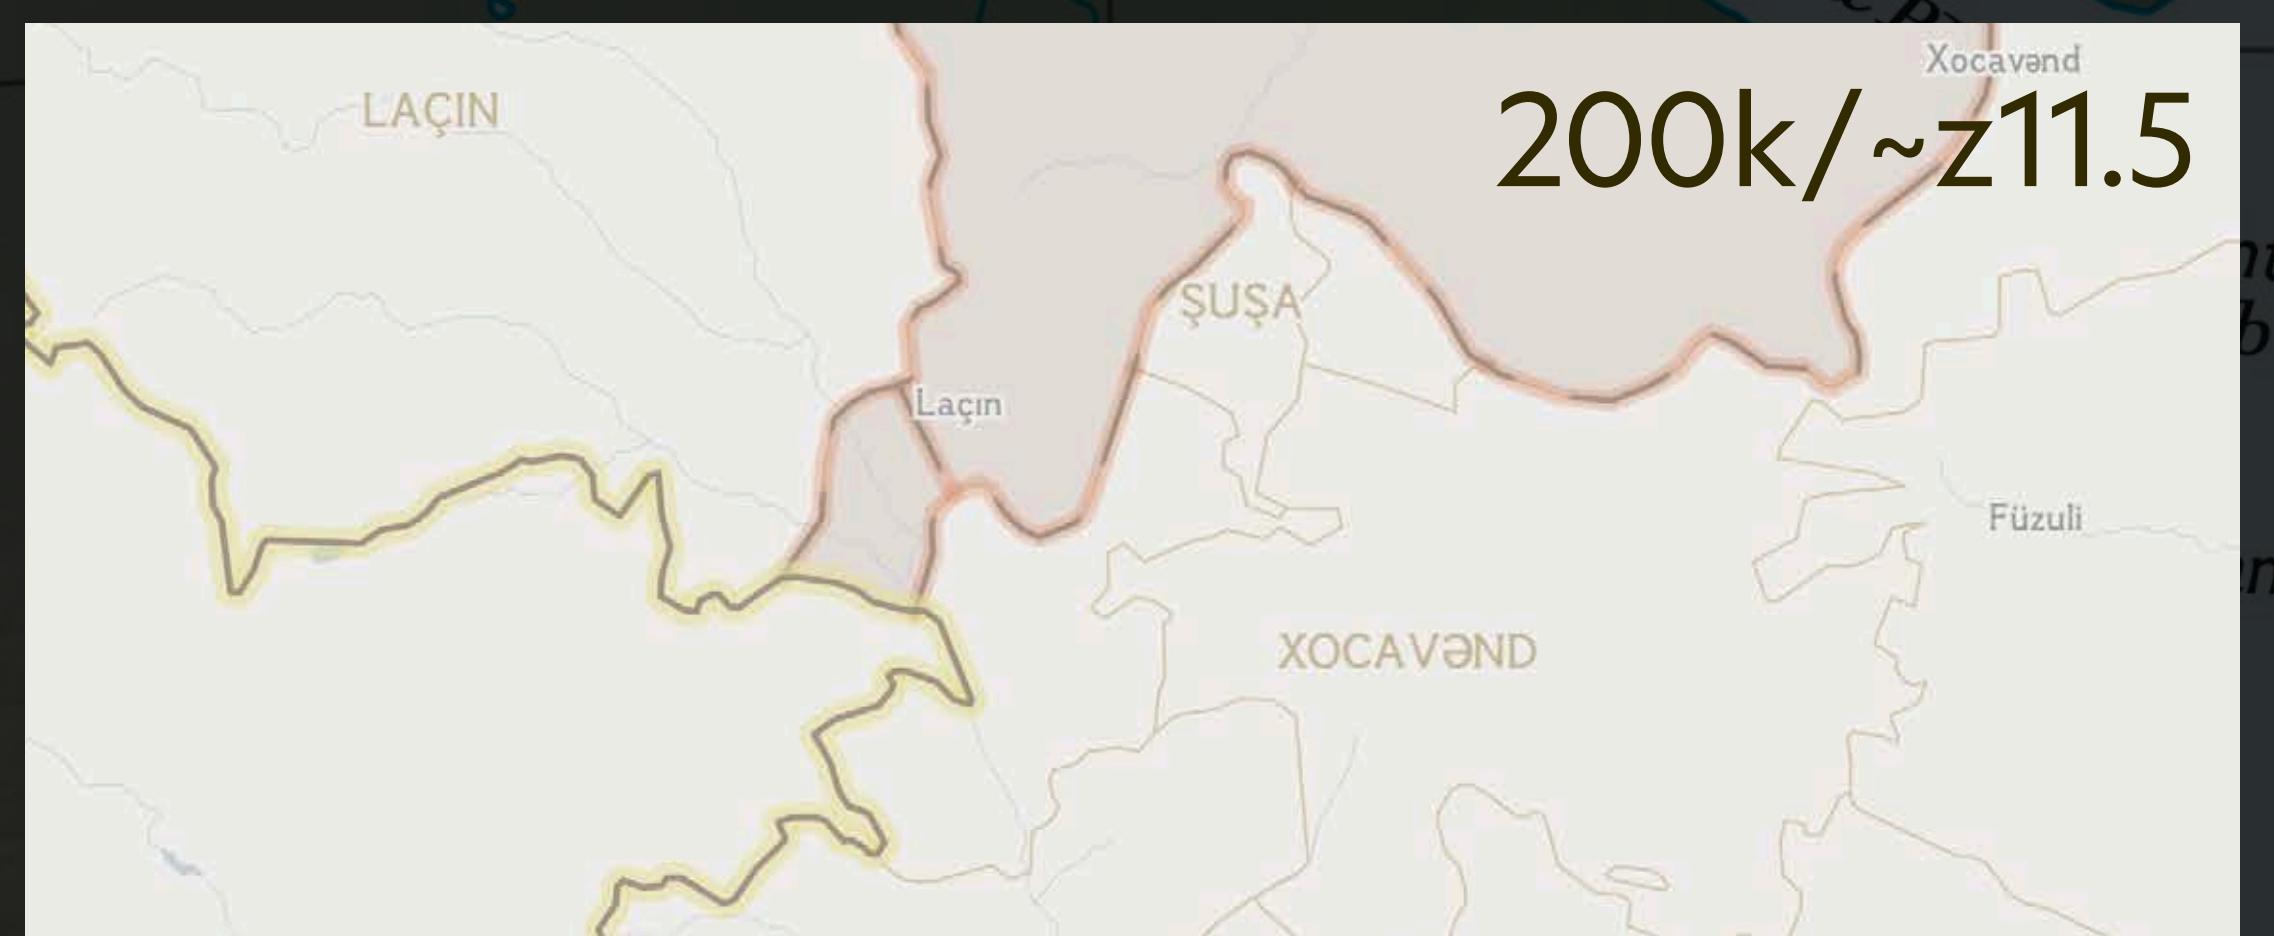

- Natural Earth

1:10,000,000 (z 6)

1:50,000,000 (z 3.5)

1:110,000,000 (z 2)

- OSM
